VOLUME 101

101(2) April, page 116

Three columns in Table 2 list Spearman’s correlations. The final column accurately notes the comparison is between the vendor and citation data. However, the two previous columns have only one title of “Link-resolver/vendor” despite the fact there are two columns of data. The fourth column should be headed “Link-resolver/vendor” and the fifth column should be headed “Link-resolver/citation.”
