

Student-run primary health clinics

ON BEHALF OF THE SOCIETY OF STUDENT-RUN FREE CLINICS, I would like to congratulate and thank you for your recently published articles^{1,2} in the *Canadian Pharmacists Journal*. As a student who is an active volunteer at my local clinic, it brings me great pleasure to see student-run clinics get the attention they deserve.

If you ever have questions regarding student clinics in the United States or elsewhere, feel free to contact me or visit either of the resources below. Again, thank you!
