Volume 87, no. 12, p. 6758–6768, 2013, https://doi.org/10.1128/JVI.03241-12. Page 6761, Fig. 1: Due to errors in preparing the figure, panels H, I, and J were inadvertently shifted and are therefore incorrectly labeled. Panel J should have been panel H in the Ets1 column. Panel H should have been panel I in the Orf73 column and labeled 40× magnification. Panel I should have been panel J and labeled 63×.

The bottom portion of Fig. 1 should appear as shown below.

Correction of the shifted panels in no way alters the interpretation or conclusions of the immunohistochemistry staining, this figure, or the paper as a whole. We apologize for any confusion the errors may have caused.
