The European gateway to the world’s research.

One site. One search. All the content.

Europe PMC provides free access to over 30 million abstracts and 3.3 million full text articles including all PubMed abstracts, PMC full text articles, selected Agricola abstracts, international patents from the European Patent Office, and more.

Europe PMC also offers RESTful web services to access both articles and grants, powerful search tools such as citation-count sort order and data citation features, a service to add publications to your ORCID, and a variety of export formats. Europe PMC integrates related research data and has an External Links service that enables any related resource to be linked from Europe PMC content.

Europe PMC is the designated repository for the open access publication mandates of 28 funders. It is developed by the European Bioinformatics Institute, the British Library, Jisc and NaCTeM.
