The Nucleotide Sequence of Shiga Toxin (Stx) 2e-Encoding Phage ϕ P27 Is Not Related to Other Stx Phage Genomes, but the Modular Genetic Structure Is Conserved

Jürgen Recktenwald and Herbert Schmidt

Institut für Hygiene und Mikrobiologie der Universität Würzburg, Würzburg, Germany

Volume 70, no. 4, p. 1896–1908, 2002. Page 1899, column 1, lines 5 and 6: “The *yecE* gene has not been reported as an integration site for phages before” should read “The *yecE* gene of *E. coli* has already been reported as an integration site for phage P-EibC in an earlier study by Sandt and Hill (55a).”

Page 1907: The following reference was inadvertently omitted.

55a. **Sandt, C. H., and C. W. Hill.** 2000. Four different genes responsible for nonimmune immunoglobulin-binding activities within a single strain of *Escherichia coli*. *Infect. Immun.* **68**:2205–2214.
