COP9 signalosome components play a role in the mating pheromone response of *S. cerevisiae*

Vered Maytal-Kivity, Ron Piran, Elah Pick, Kay Hofmann & Michael H. Glickman

CORRECTION

In the December 2002 issue of *EMBO reports*, we published an error about the name and contribution of one of the authors, Elah Pick. The second footnote should have read, "V. Maytal-Kivity, R. Piran and E. Pick contributed equally to this work."

THE ESSENTIAL GENE THERAPY RESOURCE FOR CANCER RESEARCHERS

Giving you the latest original research and reviews from laboratory investigations, pre-clinical studies and clinical trials on genetic treatments for cancer, *Cancer Gene Therapy* is the only journal exclusively covering this subject area. It is an essential resource for all researchers in the field of cancer.
