SHRINKABLE INSULATING TUBING

JAMES A. DINSMOOR

INDIANA UNIVERSITY

Tight insulating sleeves may be fitted to connectors, splices, multiple-conductor cables, *etc.*, by using Alphlex Shrinkable Tubing, manufactured by the Alpha Wire Corporation, 200 Varick Street, New York 14. When heated with a burner, a soldering iron, or a match, this tubing shrinks in a few seconds to a predetermined size, gripping tightly any enclosed object of greater diameter. Alpha No. FIT-275-10, for example, is supplied with an inside diameter of .191 in. and shrinks to a diameter of .112 in. This size grips the shank of a Nuway snap. The standard package is 25 four-foot lengths and sells for less than \$30. Most sizes are available in black, red, white, and yellow.
