EDITOR'S QUIZ: GI SNAPSHOT

Abdominal pain following cardiac transplantation

Robin Spiller, *Editor*

Clinical presentation

A 58-year-old Caucasian woman presented with a 1-month history of abdominal pain. Her medical history was significant for a cardiac transplantation two years before admission. Routine blood tests were normal.

Question

What abnormality does the CT scan (fig 1) and the histological examination of the CT-guided biopsy of the lesion (fig 2) demonstrate? What was the cause of her abdominal pain?

See page 781 for answer

Figure 1 CT scan.

Figure 2 CT guided biopsy of lesion (H&E, ×400).
