FIFTEEN MONTHS' EXPERIENCE OF ELECTRIC ILLUMINATION OF THE BLADDER IN THE DIAGNOSIS OF OBSCURE VESICAL DISEASE.

By E. HURRY FENWICK, F.R.C.S.,

Assistant-Surgeon to the London Hospital; Surgeon (Out-patient) to St. Peter's Hospital for Urinary Diseases.

(Continued from page 993.)

The following is a tabular statement of the cases observed:—

No.	Initials.	Sex.	Age.	Under the Care of.	Present at the Cystoscopy.	Prominent Symptom.	Disease Found.
1	B. E.	M	34	Self	Self. Examined five times	Hæmaturia	Hæmorrhagic cystitis.
2	Mr. B.	"	30	Self	Self. Examined twice	"	Renal source.
3	N. C.	"	70	Mr. Eve	Mr. Eve and others	"	Epithelioma of base (right side) drained.
4	M. B.	F	55	Mr. Heycock	Mr. Heycock and others	"	Encephaloid cancer of left base removed, and recurred.
5	Mr. C.	M	52	Drs. Harvey and Underwood	Dr. Underwood	"	Of renal origin.
6	Mr. H.	"	31	Mr. Molson	Self	Frequency and pain	Large calculus, (latent).
7	R. S.	F	27	Mr. Jessett	Mr. Jessett and others	Pain	Chronic cystitis.
8	W. G.	M	26	Mr. McCarthy	Mr. McCarthy and others	Hæmaturia	Tubercular disease of base.
9	—	"	20	Dr. Calvert and Mr. Reeves	Several	"	Tubercular cystitis.
10	I. L.	"	62	Mr. Heycock	Mr. Heycock and others	"	Villous epithelioma, (extensive). Operation not advised.
11	L. N.	"	24	Mr. Coulson	Mr. Coulson and others	"	Tuberculous cystitis.
12	G. M.	"	63	Mr. Edwards	Mr. Edwards and others	"	Villous (?) carcinoma. Operation not advised.
13	Mr. J. H.	"	60	Dr. Benham	Dr. Benham	" (profuse)	Calculus.
14	Mr. P.	"	45	Drs. De Gruyther and Carmalt Jones	Several	"	Carcinoma of posterior wall. Operation contraindicated.
15	Mr. H.	"	65	Dr. F. M. Corner	"	Frequency and pain	Chronic cystitis.
16	Mr. C.	"	55	Dr. Slimon	"	" "	Swelling of neck. Died of tuberculosis.
17	Mr. M.	"	26	Sir A. Clark	"	"	Tuberculosis.
18	Mrs. H.	F	40	Drs. Davson and Waterhouse	Dr. Davson & Dr. Waterhouse	Hæmaturia	Right renal hæmaturia and localised right-sided hæmorrhagic cystitis.
19	R.	M	40	Dr. Fly Smith	Dr. Fly Smith	Frequency	Alveolar carcinoma of posterior wall. Operation. Recurred.
20	—	"	43	Dr. Harle, of Hackney	Dr. Harle	Hæmaturia	Villous papilloma with an epitheliomatous base.
21	Mrs. N.	F	40	Dr. Moore, of Maidenhead	Dr. Moore	Pyuria	Of right renal origin. Pyelitis.
22	E. L.	"	37	Hospital	Self	Frequency and pain	Chronic cystitis.
23	Mrs. T.	"	46	Dr. Cursham Corner	Several	Frequency and grit	Chronic cystitis.
24	Miss B.	"	27	Dr. Hepworth, of Manchester and Dr. Battersby, of Cannes	Drs. Hewitt and Lys	Hæmaturia	Left renal origin.
25	R. D.	M	26	Dr. S. Miller, of Windsor	Several	"	Growth removed. An important case.
26	Mr. W.	"	37	Dr. Cole, of Bath and Dr. Grose of Melksham	"	Hæmaturia and frequency	Tubercular exfoliating cystitis.
27	Mr. O.	"	56	Dr. Travers Stubbs	"	Hæmaturia six weeks	Epithelioma—removed by suction and recurred.
28	Mr. D.	"	57	Dr. Stewart, of Newport-on-Tay and Dr. White	Dr. White	Frequency and pain	Chronic cystitis: of prostatic origin
29	Mr. W.	"	39	Dr. Sparrow, of Southsea	Mr. George Pollock	Frequency	Epithelioma posterior wall; drained
30	Mr. L. J.	"	62	Dr. Simms	Dr. Simms	Hæmaturia	Epithelioma on posterior wall.
31	Miss W.	F	41	Sir A. Clark	Sir A. Clark and Dr. Matthews	"	Of renal origin: (cardiac.)
32	Mrs. B.	"	43	Dr. Oldfield	Duncan Dr. Oldfield	"	Villous papilloma of posterior wall over left ureter.
33	Mr. F. O.	M	47	Dr. F. M. Corner	Dr. F. M. Corner	"	Tuberculosis.
34	T.	"	39	Dr. Caesar	Several	Hæmaturia and frequency	Tuberculosis.
35	Mr. C. B.	"	32	Dr. Bull, of Chislehurst	Self. Examined twice	Frequency and pain	Chronic cystitis.
36	Mr. J. H.	"	53	Homœopath	Dr. Goodman	Hæmaturia	Flat epithelioma posterior wall.
37	I. C.	"	60	Out Patient	Self	"	Epithelioma over right ureter.
38	Mr. W.	"	22	Dr. Debenham and Dr. Goldie	Several	Frequency and pain	Tuberculosis.
39	Mr. H.	"	44	Self	"	Profuse hæmaturia two weeks	Hæmorrhagic cystitis.
40	Mr. S.	"	75	Mr. B. W. Walker	Mr. Walker	Frequency	Chronic cystitis.
41	J. A.	"	75	Self	Dr. Semple and Dr. Kitching of Cleveland	Pain, frequency and hæmaturia	Epithelioma over right ureter.
42	W. R.	"	20	"	Self	Hæmaturia: painless	Ulceration: probably tuberculous.
43	E. P.	"	20	"	"	Great frequency: muco-pus in urine	Prolapsed ureter. Cystitis.

ERRATUM.—Page 991, second column, last line but one, for "Mr. George L. Johnson" read "Mr. George Pollock."

REPORTS

ON

MEDICAL & SURGICAL PRACTICE IN THE HOSPITALS AND ASYLUMS OF GREAT BRITAIN, IRELAND, AND THE COLONIES.

ROYAL INFIRMARY, NEWCASTLE-UPON-TYNE.

CASE OF WATER-LOGGED KIDNEY TREATED BY ASPIRATION, INCISION, AND DRAINAGE, AND SUBSEQUENTLY BY REMOVAL OF THE KIDNEY: FATAL RESULT.

By FREDERICK PAGE, Surgeon to the Royal Infirmary, etc.

M. C., a general servant, aged 21 years, was admitted into the Royal Infirmary, Newcastle-upon-Tyne, March 3rd, 1888, suffering from what was supposed to be an ovarian tumour. She stated that ten years ago, while at school, she fell over a form and injured her right side. She was in consequence confined to bed for some weeks with an acute attack of illness, which she was told was an inflammation of the side. Nothing more definite could be learned of this illness. When able to get about again, it was noticed she had a swelling, about the size of an orange, a little below the short ribs on the right side. During the following three years her health was so delicate that she was unable to do much. The swelling in the side never disappeared, though it varied from time to time in size, but the patient could not state that its size varied with the amount of urine she passed. Five years after the accident, at the age of 16, she went out as a
