Blm10 binds to pre-activated proteasome core particles with open gate conformation

Andrea Lehmann, Katharina Jechow & Cordula Enenkel

EMBO reports (2008) 9, 1237–1243; doi:10.1038/embor.2008.190

Unfortunately, the above article had an error in the first sentence of the abstract. It should have read “Blm10 is bound to the yeast proteasome core particle, a crucial protease of eukaryotic cells”. We apologize for any confusion this might have caused.
