corrigendum

Necessary and sufficient factors for the import of transfer RNA into the kinetoplast mitochondrion

Saikat Mukherjee, Sudarshana Basu, Pratik Home, Gunjan Dhar & Samit Adhya

EMBO reports (2007) 8, 589–595. doi:10.1038/sj.embor.7400979

Dr S. Adhya, the corresponding author of the above research report, has informed the journal of an error in the legend to Fig 4B.

The correct legend to this figure part should read:

Fig 4 | (B) Total or mitochondrial proteins in uninduced or knock-down lines. Cells were [³⁵S]methionine labelled in the absence (lanes marked 'Total') or presence (lanes marked 'Mitochondrial') of cycloheximide, resolved by SDS-polyacrylamide gel electrophoresis and fluorographed. CO, cytochrome oxidase; CYB, cytochrome *b*; MURF, maxicircle unidentified reading frame; ND, NADH dehydrogenase subunit; RIC, RNA import complex; Tet, tetracycline; tRR, tRNA^{Arg}; tRV, tRNA^{Val}; tRY, tRNA^{Tyr}; tRI, tRNA^{Ile}.
