It has recently been noted that an image panel in Fig 4D (Limk1-S596D without PKI) was duplicated and also shown in the panel for Limk1-S596D with PKI. The figure should have been published as it is shown here. This change does not alter the conclusions.

The authors also point out that the panel on the far left in Fig 3A is also shown in its original context in supplementary Fig S4 online. This lane was reproduced in Fig 3A to show the background level of GST-cofilin phosphorylation.
