Of Haiku and Cancer

Breast cancer cell
National Cancer Institute

Transformation

protooncogenes
malignant neoplasms
Jekyll and Hyde case

Metastasis

renegade tumors
unruly progenitors
ravage the being

RNA interference

small AUCGs
cellular vigilantes
silence roguish genes

Breast Cancer

Achilles' heel
mutant BRCA genes
surveillance protects

Apoptosis

sound biology
self destruct unwanted cells
no place for cancer

Antioxidants

scavenge radicals
but make chemo less potent
beware of smart ads
