The author and editors have requested the withdrawal of this article from the Article in Press section of ScienceDirect as the data in the article may not be scientifically valid and could ultimately cause harm to patients.

However, please be advised that this article has been accidentally hosted online in Schizophrenia Research (vol 119 issue 1–3, pp. 40–46) and on other online platforms, but not in the printed version. This means that there is a discrepancy between the printed issue and the issue hosted on some online platforms with the exception of ScienceDirect, where both printed issue and online issue are identical.
