Volume 26, no. 15, p. 5771–5783, 2006. Page 5776, Fig. 4: In panels A and B, groups of 3 lanes were spliced together to optimize presentation of the data. This in no way detracts from the veracity of the findings of the paper, and the conclusions based on data in the figure are unaltered. We apologize for not having made the splicing clear in either the legend or the figure itself. The following sentence should be added at the end of the Fig. 4B legend: “In panels A and B, lanes 1 to 3, 4 to 6, 7 to 9, and 10 to 12 were spliced together to optimize presentation.”

Page 5776, column 2, line 30: “Fig. 5A” should read “Fig. 4A.”

Page 5776, column 2, line 36: “Fig. 5B” should read “Fig. 4B.”
