Due to an author error, part of the legend for Figure 4, relating to panels D–G, in the above paper was reproduced incorrectly. The correct part of this legend is shown below:

The results of immunoprecipitation–Western blot analysis for p73–SSRP1 interaction in cells are shown in (D), while those for p53–SSRP1 interaction are shown in (E). Panels F and G show the interaction between p63 and SSRP1 in 293 cells after treatment with 0.25 μ M of doxorubicin (Dx). Cell lysates were harvested at different time points after treatment for immunoprecipitation (IP) with antibodies against SSRP1 (F) or p63 (G), followed by Western blot analysis with antibodies against SSRP1 and p63, as indicated on the left.
