The address of Kansai Medical University has been updated in the author list above. In addition, the acknowledgement left out some funding sources for the experiments carried out at the BioCAT beamline at Argonne National Laboratory. The full acknowledgment should read:

Acknowledgment

The authors are grateful to Professor Stuart L. Schreiber of Harvard University for kindly providing the expression vector containing PI3K SH3 domain, and to Dr. Masayuki Morita of Kansai Medical University for kindly helping with *E. coli* expression. We thank Dr. Liang Guo at Argonne National Laboratory helpful assistance in setting up the beam line for experiments, and Charles Dumont for help with data collection. This study was supported by a Grant-in-Aid for Scientific Research (No.20540400) from the Ministry of Education, Culture, Sports, Science and Technology. M.G. and S.J.K. were supported by National Institutes of Health grant R01-GM093318. SAXS measurements were performed under

proposal number 2006G407 and 2008G684 of the Photon Factory. Additional data was collected on BioCAT-18, managed by Prof. Thomas Irving, and supported by proposal GUP-6360 of the Advanced Photon Source at the Argonne National Laboratory. "Use of the Advanced Photon Source, an Office of Science User Facility operated for the U.S. Department of Energy (DOE) Office of Science by Argonne National Laboratory, was supported by the U.S. DOE under Contract No. DE-AC02-06CH11357. BioCAT was supported by grants from the National Center for Research Resources (2 P41 RR008630-17) and the National Institute of General Medical Sciences (9 P41 GM103622-17) from the National Institutes of Health.
