Genome-wide analysis reveals a role for BRCA1 and PALB2 in transcriptional co-activation

Alessandro Gardini, David Baillat, Matteo Cesaroni & Ramin Shiekhattar

DOI 10.15252/embj.201470080

Correction to: *The EMBO Journal* (2014) 33: 890–905. DOI 10.1002/embj.201385567 | Published online 3 February 2014

The authors of the above article inadvertently failed to acknowledge funding from Formula Grant from the Pennsylvania Department of Health. The complete Acknowledgements are given below.

Acknowledgements

All genome-wide data presented in the paper are available at GEO (GSE45715). We thank Ralph Scully for providing the HCC1937 cell lines. We thank

members of the Wistar Institute Genomics facility for processing of ChIP-seq samples and expression arrays, we also thank the Bioinformatics Core Unit for the analysis of Illumina BeadArrays. This work was supported by Grant R01-CA 090758 (RS), Formula Grant from the Pennsylvania Department of Health, PA Breast and Cervical Cancer Research Initiative to RS, P30 CA 010815 from the National Institute of Health. AG was supported by an American-Italian Cancer Foundation Post-Doctoral Research Fellowship.
