Erratum

Dissolved hydrogen and nitrogen fixation in the oligotrophic North Pacific Subtropical Gyre

Samuel T. Wilson,* Daniela A. del Valle, Julie C. Robidart, Jonathan P. Zehr and David M. Karl

Errors have been found on Table 3 of the article by Wilson *et al.* (2013), published as part of the October 2013 issue of *Environmental Microbiology Reports*.

The downward diffusion rates of H₂ shown in Table 3 (column 4) should read 0.46 and 0.78 nmol H₂ m⁻² h⁻¹ for Stn 3 and 13, respectively. The authors thank John Cullen for highlighting this.

The authors apologize for these errors and would like to note that these changes do not alter the principal conclusions of their research article.
