Erratum to “How reliable are self-reports of HIV status disclosure? Evidence from couples in Malawi” [*Soc. Sci. Med.* 144 (2015) 28–37]

Amy A. Conroy* and Lauren H. Wong

Center for AIDS Prevention Studies, University of California San Francisco, 550 16th Street, 3rd Floor, San Francisco, CA 94158, USA

The publisher regrets that an error occurred during the publication of the above article, which resulted in a number of the author’s corrections being omitted. The corrected text is given below:

1. The 4th sentence of the Introduction section on page 28 should read:

Even for those who test negative – the majority of testers in sub-Saharan Africa – disclosure provides an important opportunity for couples to communicate about risk reduction approaches that might not occur otherwise (Crepaz and Marks, 2004; Desgrees-Du-Lou et al., 2007).

2. In section 2.1 on page 29, the first sentence should read:

The data were from Tsogolo la Thanzi (TLT; “Healthy Futures” in Chichewa), a prospective cohort study that took place from 2009 to 2011 in the Balaka district of southern Malawi (details available online at: <http://sites.psu.edu/tltc/>).

3. In the 4th paragraph of section 2.1 on page 30, the 2nd and 3rd sentences should read:

The relationship power module was designed to understand power dynamics within sexual relationships, as opposed to other relationship types, given the accompanying risks for HIV infection and other negative health outcomes that occur within such relationships (Blanc, 2001; Pulerwitz et al., 2000). Thus, respondents were asked the power statements if they reported a current sexual partner including a spouse, live-in partner, or steady boyfriend/girlfriend.

4. In the 1st paragraph of section 3 on page 33, the 8th sentence should read:

By wave 4, 7.4% of the sample tested positive for HIV.

5. The opening sentence of section 4.1 on page 35 should read:

Several limitations of this study are noteworthy.

6. The Acknowledgments on page 36 should include the following link after the first sentence:

*Corresponding author. amy.conroy@ucsf.edu (A.A. Conroy).
