This article has been retracted: please see Elsevier Policy on Article Withdrawal (<http://www.elsevier.com/locate/withdrawalpolicy>).

This article has been retracted at the request of the Editor.

An image in Fig. 6 was reused to represent two different experimental conditions: images of paclitaxel alone (“Paclitaxel”) and of thymoquinone plus paclitaxel (“TQ + Paclitaxel”) are manipulations of the same image.

The article has been retracted because the data integrity has become questionable.
