To the Editor-in-Chief of Immune Network

I deeply regret but request a retraction of our paper published in Immune Network. Unfortunately, the study described above was plagiarized from the published article titled

“Gilthead seabream (*Sparus aurata* L.) innate immune response after dietary administration of heat-inactivated potential probiotics” in FSI (2006;20:482-492). As a corresponding author, I will take full responsibility and respectfully request retraction of the paper from Immune Network.
