ERRATUM

The April 20, 2016 article by van Leeuwen et al, entitled “Influence of the Acidic Beverage Cola on the Absorption of Erlotinib in Patients With Non–Small-Cell Lung Cancer,” (J Clin Oncol 34:1309-1314, 2016) required additional clarification.

In Figure 2, arithmetic means were used. The figure has been updated to show **geometric means** instead. Also in Figure 2, the **variability** is now presented as error bars.

The legend for Figure 2 has been updated accordingly to:
Pharmacokinetic profile. Geometric mean dose corrected

concentration v time profiles are shown for erlotinib alone administered with water or cola (treatment group A, n = 14) and erlotinib + esomeprazole with water or cola (treatment group B, n = 14).

The online version has been corrected in departure from the print.
