With great appreciation, the Editorial Board extends sincere thanks to all our colleagues who performed peer review for *Journal of Medical Toxicology (JMT)* in 2016. A medical journal cannot exist without the tireless, and often thankless, work of its reviewers. Peer review remains an important step in making sure the studies published in *JMT* are relevant, valid, and scientifically credible. This is a complicated time for scientific publishing, and just because something is published does not mean it is perfect [1, 2]. But at *JMT*, it is safe to say our reviewers help our authors make their final product better. Without the enthusiasm, dedication, and support of our reviewers, we would not be able to present to our readers the excellent scholarly contributions that fill these pages each issue. The list includes only those reviewers registered on

our web-based program (Editorial Manager), so a few who have reviewed may not be on the list. To those reviewers omitted from this list, we apologize, but also thank you very much. In addition to being acknowledged here and seeing the outcome of their service in every published manuscript, peer reviewers at *JMT* are eligible for up to 15 credits of CME from our partners at the CDC. If you have any interest in serving as a peer reviewer for *JMT*, please complete the application at our website or write us directly at jmtinfo@acmt.net.

Many thanks to our reviewers in 2016.

Mark B. Mycyk, MD, FACMT
Editor in Chief, *Journal of Medical Toxicology (JMT)*
