Errata: “A Simulation Protocol for Exercise Physiology in Fontan Patients Using a Closed Loop Lumped-Parameter Model”
[Journal of Biomechanical Engineering, 2014, 136(8), p. 081007,
DOI:[10.1115/1.4027271](https://doi.org/10.1115/1.4027271)]

**Ethan Kung, Giancarlo Pennati, Francesco Migliavacca, Tain-Yen Hsia,
Richard Figliola, Alison Marsden, and Alessandro Giardini**

The formula for $E(t)$ in Appendix A (p. 11) should be corrected as

$$E(t) = \begin{cases} E_{\max} \operatorname{En}\left(\frac{0.3}{t_{\text{svs}}} t\right) + E_{\text{offset}}, & \frac{t}{t_{\text{svs}}} \leq 3.33 \\ E_{\text{offset}}, & \text{elsewhere} \end{cases}$$
