Corrigendum to “Global and gene-specific DNA methylation alterations in the adolescent amygdala and hippocampus in an animal model of caregiver maltreatment”

[*Behav. Brain Res.* 298 (Pt A) (2016) 55–61]

The authors regret that, due to a submission error, they had to replace the graph depicting *Bdnf* methylation levels in the adolescent dorsal hippocampus, the original of which mistakenly depicted *Bdnf* methylation levels in the ventral hippocampus. Replacing the figure does not change any information in the text, interpretation of the data, or conclusions.

Fig. 5 (corrected). Differences in *Bdnf* methylation at exons I and IV in the adolescent dorsal hippocampus; n = 8–9/group; error bars represent SEM.
