Retraction for Korczeniewska and Barnes, “The COP9 Signalosome Interacts with and Regulates Interferon Regulatory Factor 5 Protein Stability”

Justyna Korczeniewska, Betsy J. Barnes

Department of Biochemistry & Molecular Biology, New Jersey Medical School, UMDNJ, Newark, New Jersey, USA; New Jersey Medical School-University Hospital Cancer Center, UMDNJ, Newark, New Jersey, USA

Volume 33, no. 6, p. 1124–1138, 2013, <https://doi.org/10.1128/MCB.00802-12>. It was recently brought to our attention that this article contains erroneous image duplications of some Western blots in four figures. Image duplications were found to occur primarily in loading controls, such as β -actin and GAPDH (glyceraldehyde-3-phosphate dehydrogenase), but were not limited to these. We deeply apologize to the readership of MCB for these errors, and we retract the article. A corrected article is in progress.
