The April 1, 2014, ASCO 50th Anniversary article by Johnson et al, entitled “Recent Clinical Advances in Lung Cancer Management” (J Clin Oncol 32:973-982, 2014), contained an error.

In the Treatment of SCLC section, under Treatment of Stage IIB and III SCLC, the second sentence of the third paragraph gave the dose of prophylactic cranial irradiation as 25 Gy in 5 fractions, whereas it should have been 25 Gy in 10 fractions,

as follows: “Recent studies have noted decreased late cognitive improvement with doses of 25 Gy in **10** fractions with equal survival and brain relapse rates compared with higher doses.”

The online version has been corrected in departure from the print. The authors apologize for the mistake.
