CORRECTION

Correction: It's not the 'what', but the 'how': Exploring the role of debt in natural resource (un)sustainability

Julen Gonzalez-Redin, J. Gareth Polhill, Terence P. Dawson, Rosemary Hill, Iain J. Gordon

Fig 2 is incorrect. The authors have provided a corrected version here.

Fig 2. Simulation results. Results obtained for the indicators selected under a fractional-reserve system—without government intervention (red dotted line) and with government intervention when the total natural resource stock is at 25% (yellow short-dash) and 50% (green solid line)—and under a full-reserve system (purple long-dash line). Black coloured curves (i.e. dotted, solid, short and long-dashed) show the mean values, whereas coloured bands represent the standard error bars including all the runs computed for each indicator under every scenario.
