ACTA INFORM MED. 2018 SEPT; 26(3): 219-220

Received: Jul 20, 2018 • Accepted: Jul 30, 2018

The book OCT Angiography is a handwriting which presents a good example of establishing a correlation with world literature in the field of new, sophisticated ophthalmology diagnostics. It represents a concise and sufficiently detailed monography on the new OCTA diagnostic method in ophthalmology. It is very important to note that the author of the book used their own material with her own descriptions and comments on every single image included, which gives the material a great value and worthiness. The book has 24 chapters: 1) Optical Coherence Tomography Angiography; 2) Choroidal Neovascularization; 3) Dry Age-related Macular Degeneration; 4) Neovascular/Exudative/Wet Age-related Macular Degeneration; 5) Central Serous Retinopathy; 6) Polypoidal Choroidal Vascularopathy, Idiopathic Polypoidal Choroidal Vascularopathy; 7) Diabetic Retinopathy; 8) Degenerative Myopia; 9) Retinal Artery Occlusion; 10) Retinal Vein Occlusion; 11) Sympatric Chorioretinitis; 12) Posterior Vitreous Detachment; 13) Epiretinal Membrane, Cellophane Maculopathy and Macular Pucker; 14) Vitreomacular Traction Syndrome; 15) Macular Pseudohole; 16) Lamellar Macular Hole; 17) Full Thickness Macular Hole, Stage 4; 18) Toxoplasmic Chorioretinitis; 19) Albinism; 20) X-linked Juvenile Retinoschisis; 21) Radiation Retinopathy; 22) Glaucoma; 23) Optic Neuritis and Papilledema. Authors of these chapters are: Aida Kasumovic, MD; Emir Cabric, MD, PhD; Maja Zivkovic, MD, PhD; Lejla Muhamedagic, MD, MSc; Orhan Lepara, MD, PhD; Nesina Avdagic, MD; PhD and

Tatjana Jetic, MD. Authors are physicians and teachers from universities in Sarajevo and Tuzla (Bosnia and Herzegovina) and Nis (Serbia).

Some of pathological cases are presented with ten to fifteen individual images and figures, aiming to help the reader properly read and analyse the patient from beginning to the end. Also, images are organized so the reader can easily compare and understand correlation between them. Documented findings give the physician a possibility of careful comparison with earlier findings of the classic OCT. The author of this work has very skillfully introduced a reader into anatomy, physiology and pathology of the most common diseases of the posterior ocular segment. The book gives also a very good overview of optic nerve pathology and OCTA findings. Monography OCT Angiography completes the requirements of educational literature from the domain of diagnostics the posterior eyesegment and can serve ophthalmologists, resi-

dents of ophthalmology as well as medical students.

The book OCT angiography represents a handy guide through the OCTA technique while illustrating and explaining various retinal diseases as well as pathology of the optic nerve. The reader is provided with a short description of epidemiology, etiology, clinical signs and symptoms, as well as diagnostic and treatment possibilities for every entity described. The book is full of illustrations, colored figures and maps of every single case from everyday clinical practice and it provides a detailed step-by-step explanation below the every figure, with the aim of better insight and logical understanding of the retinal pathology. It is easy-to-read material,

intended for medical students, residents of ophthalmology and ophthalmology specialists who are willing to expand their knowledge and to flow into the new technique of retina vascularization imaging. Every single case is represented by multiple images, which are arranged one-by-one, aiding in easy pattern recognition, diagnosis and monitoring of patients. It is updated diagnostic guidance for glaucoma experts who are willing to find out the real semiology of glaucoma development.

Save the Date: IWEEE2018 & GNUHealthCon2018
Created: 03 July 2018

EFMI LIFOSS WG invites you to attend the 11th International Workshop on eHealth in Emerging Economies (IWEEE) 2018 and GNUHealthCon2018. This year it is the 10th anniversary of the GNU Health Project.

If you would like to present a project or a topic in the context of Free and Open Source Software in healthcare please contact the organizers by sending an email to gnuhealthcon@gnu-solidario.org with your presentation abstract and your short bio.

STC 2018
Created: 30 March 2018

Special Topic Conference

The EFMI 2018 Special Topic Conference will be held from 14-16 Oct 2018 in Zagreb, Croatia. Submissions deadline prolonged until 20th of April 2018. All Information: <https://www.efmistic2018.org>

Invitation to attend the EFMI LIFOSS WG tutorial at MIE2018, 23rd of April, Gothenburg
Created: 25 March 2018

EFMI LIFOSS WG invites you to attend the Tutorial: "Transforming Healthcare in low-resource settings using free and open source software"

In this tutorial participants will get an overview of Free/Libre and Open Source in health care solutions and particular insight in the free health and hospital information system GNU Health.

Target Group: The target group of this workshop are people interested in the potential of FLOSS in health care. People with an IT background will get an idea of how to set up the system. Health professionals will get an overview of the rich functionality of GNU Health.

For more information please visit the website: <https://mie2018.org/home/programme/tutorials/transforming-healthcare/>

Looking forward to meet you at our tutorial at MIE2018!
