Acknowledgements The authors acknowledge the financial support from the state budget by the Slovenian Research Agency (program no. P3-0003) and the National Institute of Health, USA (project RO1 CA196796). The research was conducted in the scope of LEA EBAM (French-Slovenian European Associated Laboratory: Pulsed Electric Fields Applications in Biology and Medicine) and is a result of networking efforts within COST TD1104 Action. We would like to thank Mira Lavric (Institute of Oncology Ljubljana, Ljubljana, Slovenia) for all the valuable work she contributed to this research.
