SI Correction

NEUROSCIENCE

Correction to Supporting Information for “External light activates hair follicle stem cells through eyes via an ipRGC–SCN–sympathetic neural pathway,” by Sabrina Mai-Yi Fan, Yi-Ting Chang, Chih-Lung Chen, Wei-Hung Wang, Ming-Kai Pan, Wen-Pin Chen, Wen-Yen Huang, Zijian Xu, Hai-En Huang, Ting Chen, Maksim V. Plikus, Shih-Kuo Chen, and Sung-Jan Lin, which was first published June 29, 2018; 10.1073/pnas.1719548115 (*Proc Natl Acad Sci USA* 115:E6880–E6889).

The authors wish to note: “After reexamining our raw data, we found we inadvertently used two side-view photos of D07 to show side views of the same mouse on both time points D0 and D07 in Fig. S1D. The top-view photos shown for both time points D0 and D07 are correct. We wish to replace the two side-view photos of the time point D0 with correct images. Because the original top-view photos are correct and because the mouse at both time points D0 and D07 showed no change in hair growth, the conclusions drawn from the data on Fig. S1D remain unchanged after this correction.” The *SI Appendix* has been corrected online.
