Preface

Free Tissue Transfer ReconstructionYadranko Ducic, MD, FRCS(C), FACS¹¹ Otolaryngology and Facial Plastic Surgery Associates, Fort Worth, Texas

Semin Plast Surg 2019;33:3–4.

Free flap reconstruction has evolved from something done rarely and in few hands to becoming a staple of reconstruction in the tool box of reconstructive surgeons all over the body. In this issue, we are blessed to have the pleasure of having a broad field multispecialty approach to some of the most complex of defects reconstructed with free tissue transfer.

I hope that the readers will enjoy this special issue as much as we all did putting it together. Hopefully, it will serve as a nice reference when approaching large or complex defects all over the body.

Yadranko Ducic, MD, FRCS(C), FACS
