REASON FOR WITHDRAWAL

This review has been withdrawn as it will not be updated.

It is currently being split and will be updated in a series of separate reviews with different authors.

The full review 'Exercise for treating anterior cruciate ligament injuries in adults' was published in Issue 4, 2005. The protocol for 'Exercise for treating meniscal injuries of the knee in adults' was published in Issue 3, 2005 and for 'Exercise for treating anterior cruciate ligament injuries in combination with collateral ligament and meniscal damage of the knee in adults' in Issue 2, 2006. One further title has been registered: 'Exercise for treating isolated collateral ligament injuries of the knee in adults'.

The scope of these is not restricted to programmes undertaken by physiotherapists.

WHAT'S NEW

Last assessed as up-to-date: 31 December 2001.

Date	Event	Description
5 November 2008	Amended	Converted to new review format.

HISTORY

Protocol first published: Issue 1, 1999

Review first published: Issue 2, 2002
