REASON FOR WITHDRAWAL

This review has been withdrawn as authors are unable to complete the updating process.

WHAT'S NEW

Last assessed as up-to-date: 3 December 2013.

Date	Event	Description
1 August 2017	Amended	This review has been withdrawn as the authors are unable to complete the updating process

HISTORY

Protocol first published: Issue 4, 2010

Review first published: Issue 4, 2012

Date	Event	Description
19 May 2016	Amended	The authors are currently updating this review as new evidence is available which has the potential to change the conclusions of this review. In the meantime, this review is withdrawn
23 June 2014	New search has been performed	This version is an update
23 June 2014	New citation required and conclusions have changed	In this update, 6 studies were added to the review, resulting in a doubled number of participants. Of all 17 included studies, only 2 reported on the primary outcome (mortality)
23 July 2013	Feedback has been incorporated	Feedback incorporated on clarification of 3 points: contact with all study authors to obtain information on mortality in studies, identification of which participants received statins before randomisation and definition of atrial fibrillation
