Volume 90, no. 14, p. 6326–6343, 2016, <https://doi.org/10.1128/JVI.00215-16>. Page 6338, Fig. 8: The two H&E photos (panels K and O) were put into the submitted manuscript as “placeholders,” as they also represented the lesions (or lack thereof) that we wanted to display, but they unfortunately were overlooked in the final edits and were not exchanged for the actual photos. The results and conclusions were not altered with this oversight. We have the original pathology H&E and IHC slides and have taken a new photo for panel K and new paired photos for panels O and P and replaced the original photos in order to avoid any confusion.

Figure 8K, O, and P should appear as shown below.
