The March 20, 2018, article by Dieli-Conwright et al entitled “Effects of Aerobic and Resistance Exercise on Metabolic Syndrome, Sarcopenic Obesity, and Circulating Biomarkers in Overweight or Obese Survivors of Breast Cancer: A Randomized Controlled Trial” (J Clin Oncol [10.1200/JCO.2017.75.7526](https://doi.org/10.1200/JCO.2017.75.7526)) was published with an error.

In the Outcome Measures section of the Methods, the formula to calculate the metabolic syndrome (MetS) z-score read as:

$$\begin{aligned} & [(50 - \text{HDL}) / 5.5] + [(\text{TG} - 15) / 25.5] + [(\text{Glucose} - 100) / 15.9] \\ & + [(\text{waist circumference} - 88) / 8.8] + [(\text{SBP} - 130) / 11.4] + \\ & [(\text{DBP} - 85) / 10.8] \end{aligned}$$

It should have read as:

$$\begin{aligned} & [(50 - \text{HDL}) / 5.5] + [(\text{TG} - \mathbf{150}) / 25.5] + [(\text{Glucose} - 100) / 15.9] \\ & + [(\text{waist circumference} - 88) / 8.8] + [(\text{SBP} - 130) / 11.4] \\ & + [(\text{DBP} - 85) / 10.8] \end{aligned}$$

This has been corrected as of May 10, 2020. The authors apologize for the error.
