Acknowledgment of Reviewers, 2020

Peer review is at the core of scientific progress. It is through the careful critique of peer reviewers that papers are scrutinized, evaluated, and improved. A paper that has been peer reviewed bears the mark of having been inspected and found to be valid and worthy of publication. It is these peer-reviewed papers that ultimately advance our existing understanding of science.

As such, scientific outlets in general, and *JCO Clinical Cancer Informatics* in particular, owe an immense debt of gratitude to peer reviewers. *JCO Clinical Cancer Informatics* strives to provide the highest-quality peer review, so in recognition of Peer Review Week 2020 and its theme of Trust in Peer Review, we are pleased to recognize your efforts and thank you for your expertise and time by presenting this list of those who have contributed to our success.

For your hard work in 2019-2020, our heartfelt thank you!

An asterisk indicates reviewers who have reviewed three or more manuscripts in 2019-2020. Two asterisks indicate reviewers who completed the ASCO Reviewer Mentoring program. Three asterisks indicate reviewers who participated in the ASCO Editorial Fellowship program
